

# Receive Notes

## Rack Extensions Players

Vers. 1.0.0

The Rack Extensions Players "Receive Notes" is a utility that, through "In Enable", controls receipt of notes on the instrument to which it is connected.

With a "In Enable" = 0 the notes are disabled while with a "In Enable" from 1 to 127 the notes are enabled.

At the out "Thru" there will be a value=0 with a "In Enable"=0 while value=127 with a "In Enable" from 1 to 127.

When the "In Enable" is disconnected, the notes transmission is enabled.

The Switch On enables or disables the transmission of the notes
